

EUROFLEX® FOR CAMPSITES

Pavements for sidewalks, edgings, impact protection for playgrounds

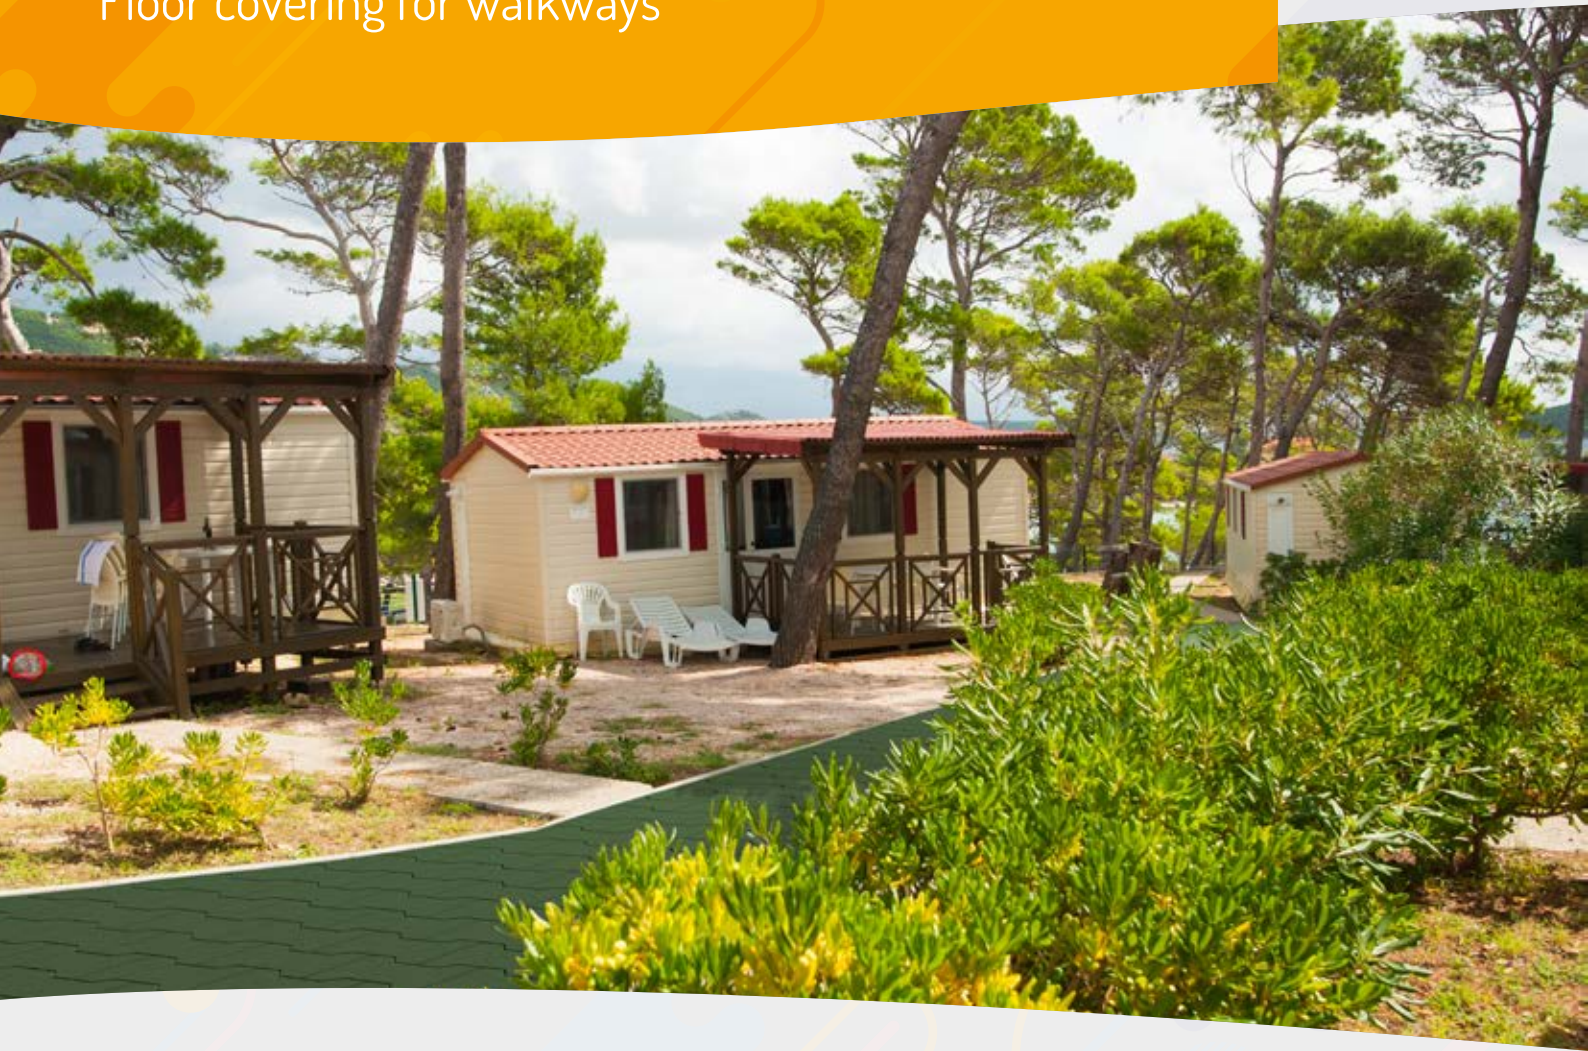

EUROFLEX®

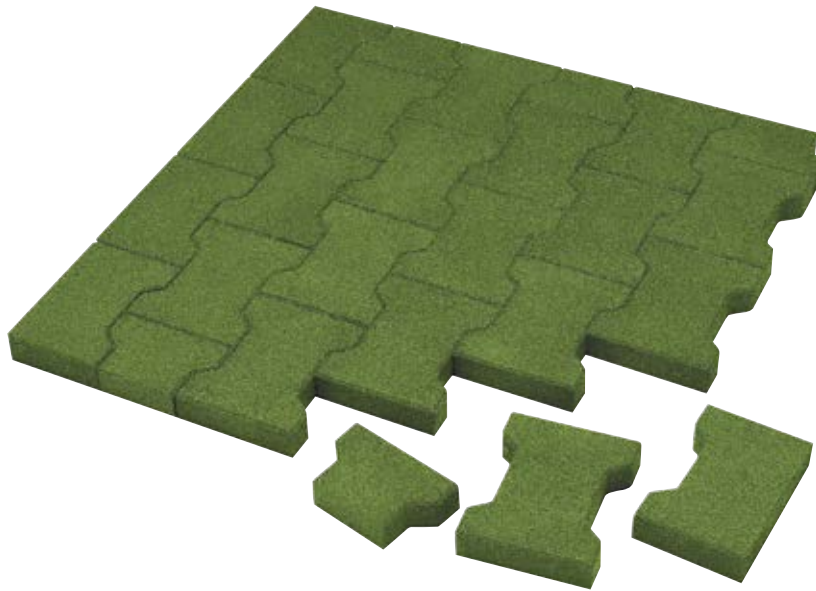

ELASTIC PAVEMENT BLOCKS

Floor covering for walkways

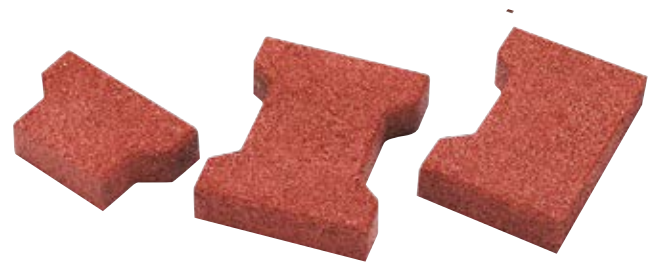

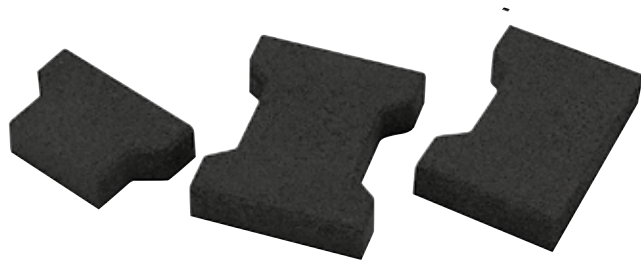

Security and noble design are not always mutually exclusive. EUROFLEX® Elastic Pavement Blocks are the ideal floor covering for all types of footpaths on campsites. The paving elements, which can be combined and are typical of their construction, allow a wide variety of individual designs. With the green paving stones it is possible to design close to nature without having to forego the positive characteristics such as a pleasant walking feeling or the high slip resistance.

Advantages & properties

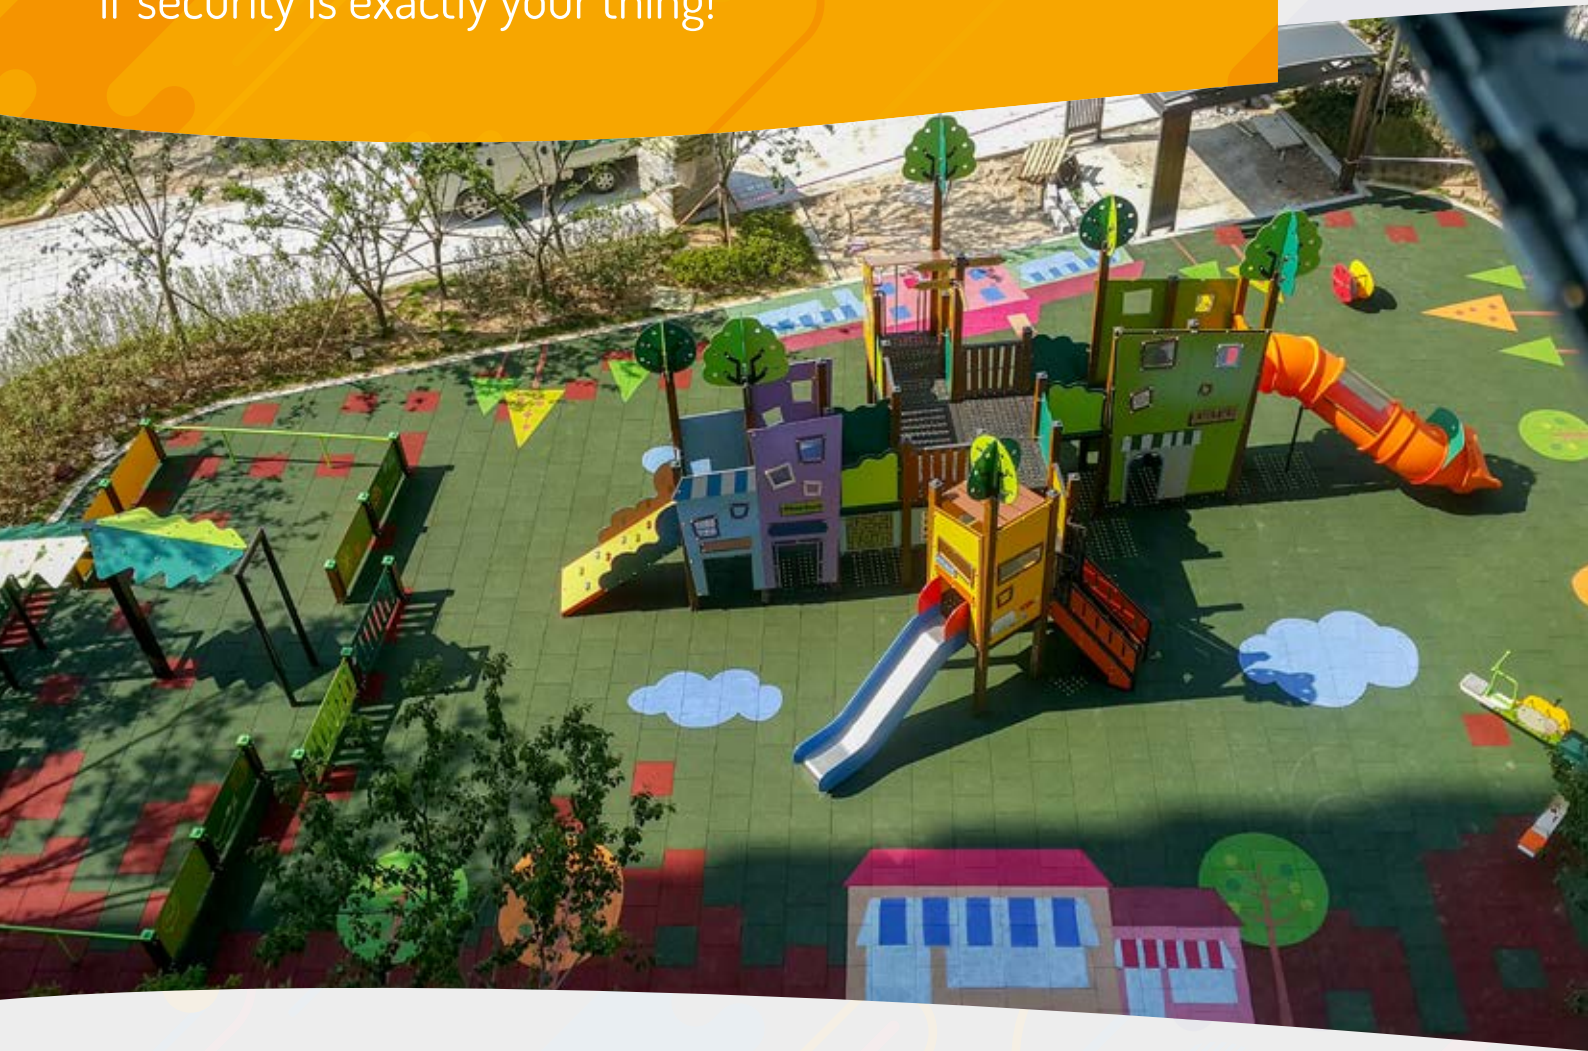

- available in green, red and grey
- approved fall height: 1.0 m
- high water permeability
- high anti-slip safety
- fast drying after rain prevents the formation of puddles
- prevents muddy paths along the most important footpaths
- high walking comfort
- fast and easy installation

IMPACT PROTECTION & SPORTS PAVEMENT SLABS

If security is exactly your thing!

Almost all campsites have playgrounds or multi-purpose sports areas. In contrast to grass or sand, the TÜV-tested EUROFLEX® impact protection slabs protect children's playgrounds from serious injuries in falls of up to 3.0 m. So children can safely romp around on equipment and live out their play instinct! Our sports pavement slab is suitable for multi-purpose sports surfaces, which shines with a high ball rebound behaviour and protects the joints due to the elastic surface.

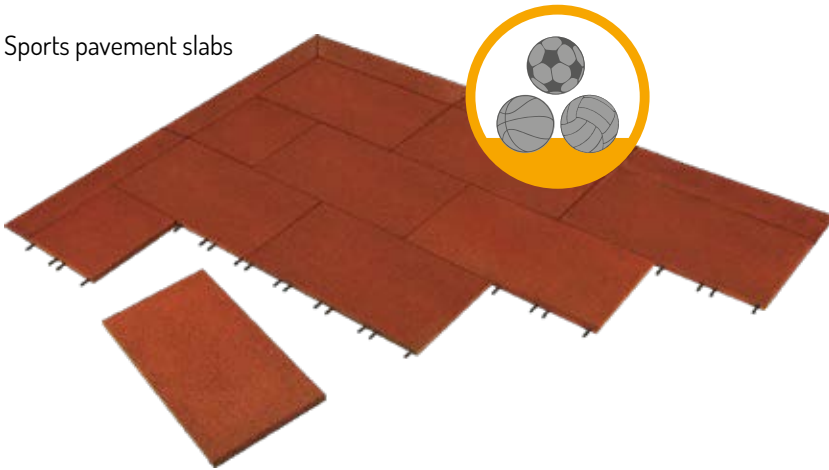

Impact protection slabs

Advantages & properties

- many friendly and strong colours
- various thicknesses for fall heights up to 3.0 m
- different variants with glitter, mulch structure or multicoloured rubber granulates
- factory pre-installed connectors
- thus fast, simple installation

Sports pavement slabs

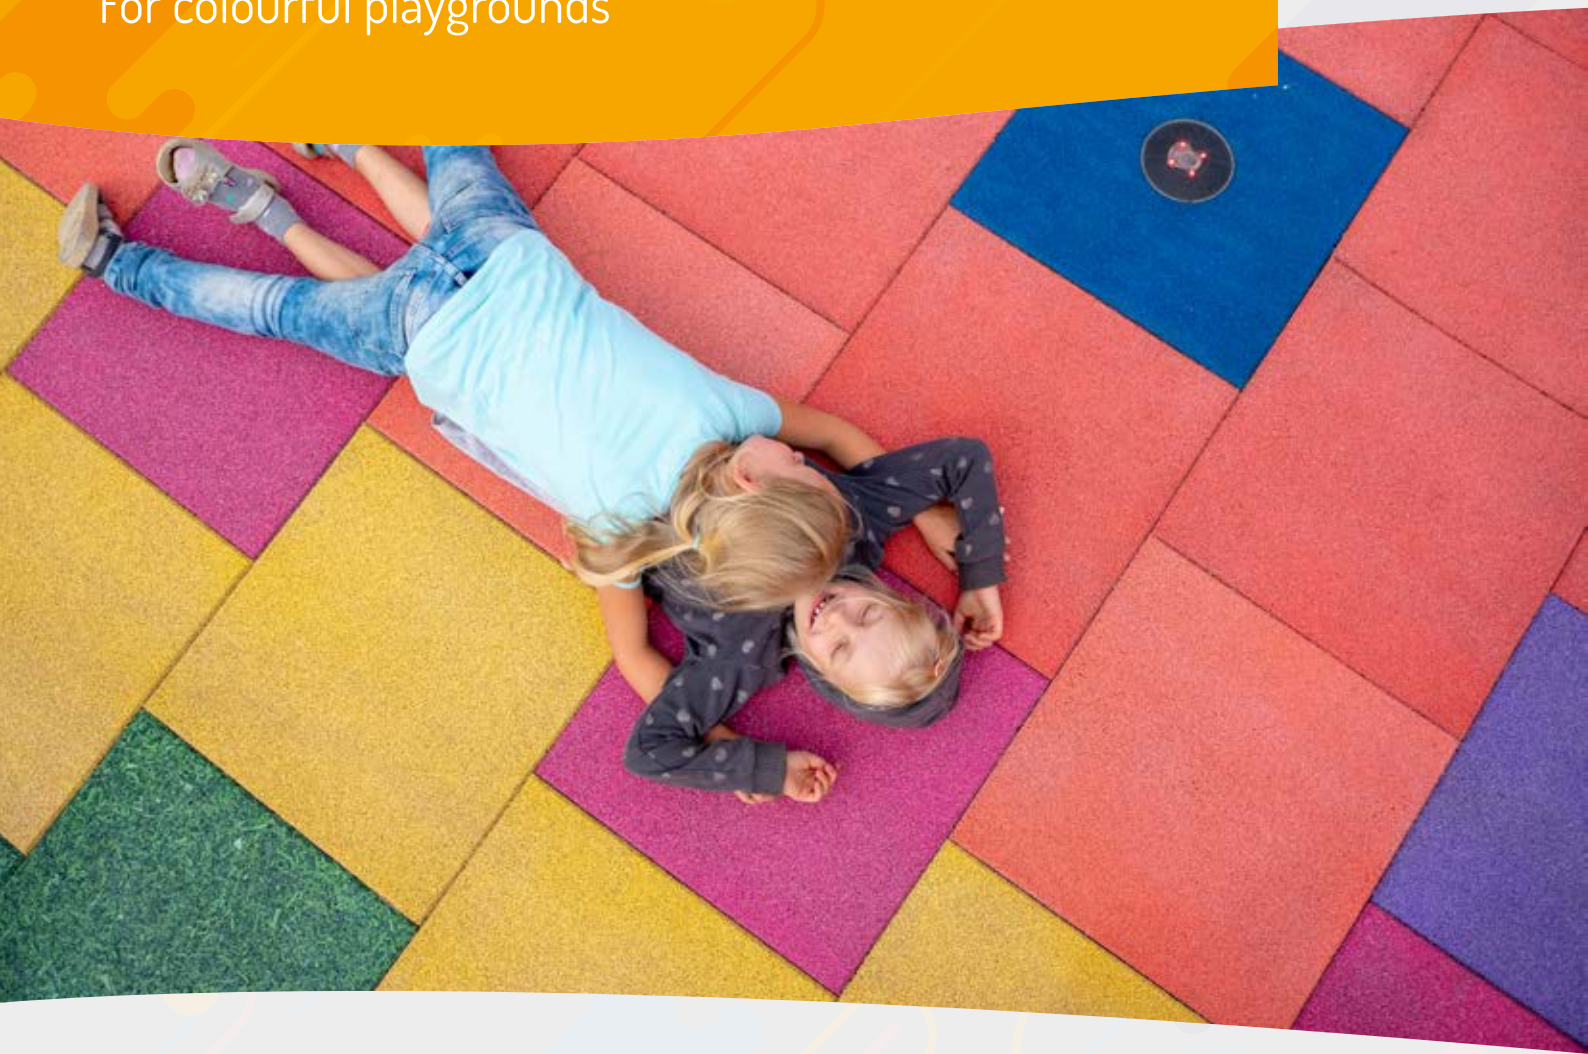

Advantages & properties

- available in SBR red, green, black, grey
- Tested fall height 0.9 m (30 mm); 1.1 m (40 mm)
- ideal for multi-purpose sports areas
- 98% Ball rebound behaviour
- factory pre-installed connectors
- thus fast, simple installation

BORDERINGS

For sandpits and lawns

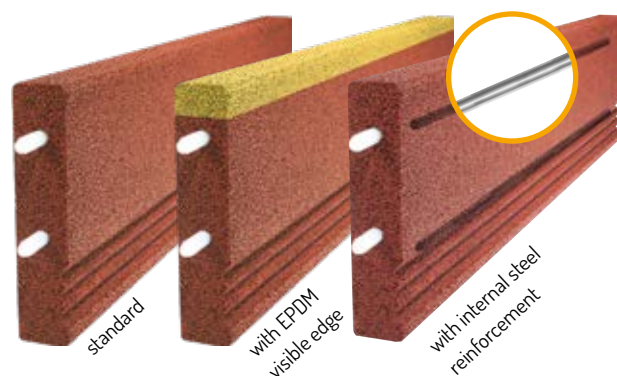

Playing in the sandbox is one of children's favourite activities. The EUROFLEX® modular sandbox edging is the perfect addition to playgrounds that separates the sandpit from the surrounding area. The soft rubber surface offers active all-round protection and protects children from painful and serious injuries. The EUROFLEX® lawn edging is perfect for edging fall protection slabs, sand pits, lawns, paths or trees.

Advantages & properties

- integrated pivot joints for adaptation to almost every sandbox shape
- internal steel reinforcement for high stability
- available in red, green, black or grey

Advantages & properties

- extremely high dimensional stability due to internal steel reinforcement
- optional with EPDM visible edge
- for edging impact protection slabs, sand pits, lawns, paths or trees.
