

EUROFLEX® FOR OUTDOOR-FITNESS

Impact protection slabs and accessories

EUROFLEX®

IMPACT PROTECTION & SPORTS SURFACING SLABS

If safety is exactly your thing!

The outdoor fitness area is enjoying increasing popularity. In many places, areas are created with fitness equipment or even entire movement parks to give fitness enthusiasts training opportunities. Especially in parkour sports safety plays an important role! In contrast to grass or sand, EUROFLEX® impact protection slabs protect against serious injuries in falls of up to 3.0 m. So parkour athletes can safely overcome obstacles and test new combinations! For drop heights up to 1.1 m, our EUROFLEX® sports surfacing slab is also suitable.

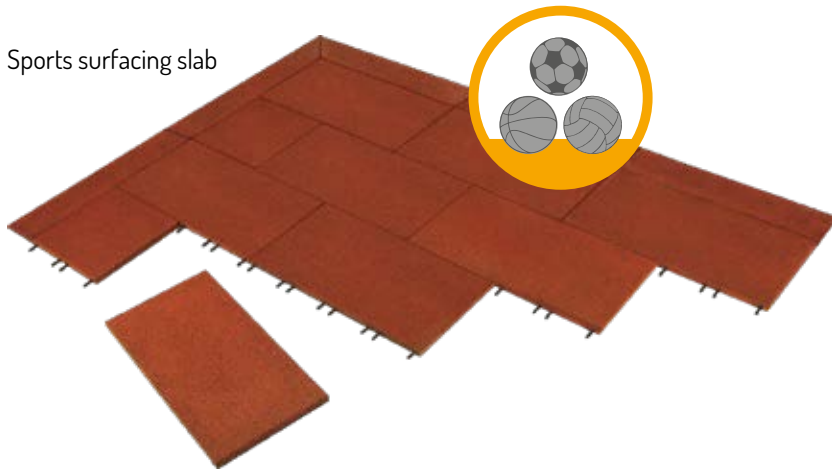

Impact protection slab

Advantages and properties

- many friendly and strong colours
- various thicknesses for fall heights up to 3.0 m (sports surfacing slab 0.9/1.1 m)
- different variants with glitter, mulch structure or multicoloured rubber granulates
- factory pre-installed connectors
- thus fast, simple installation

Sports surfacing slab

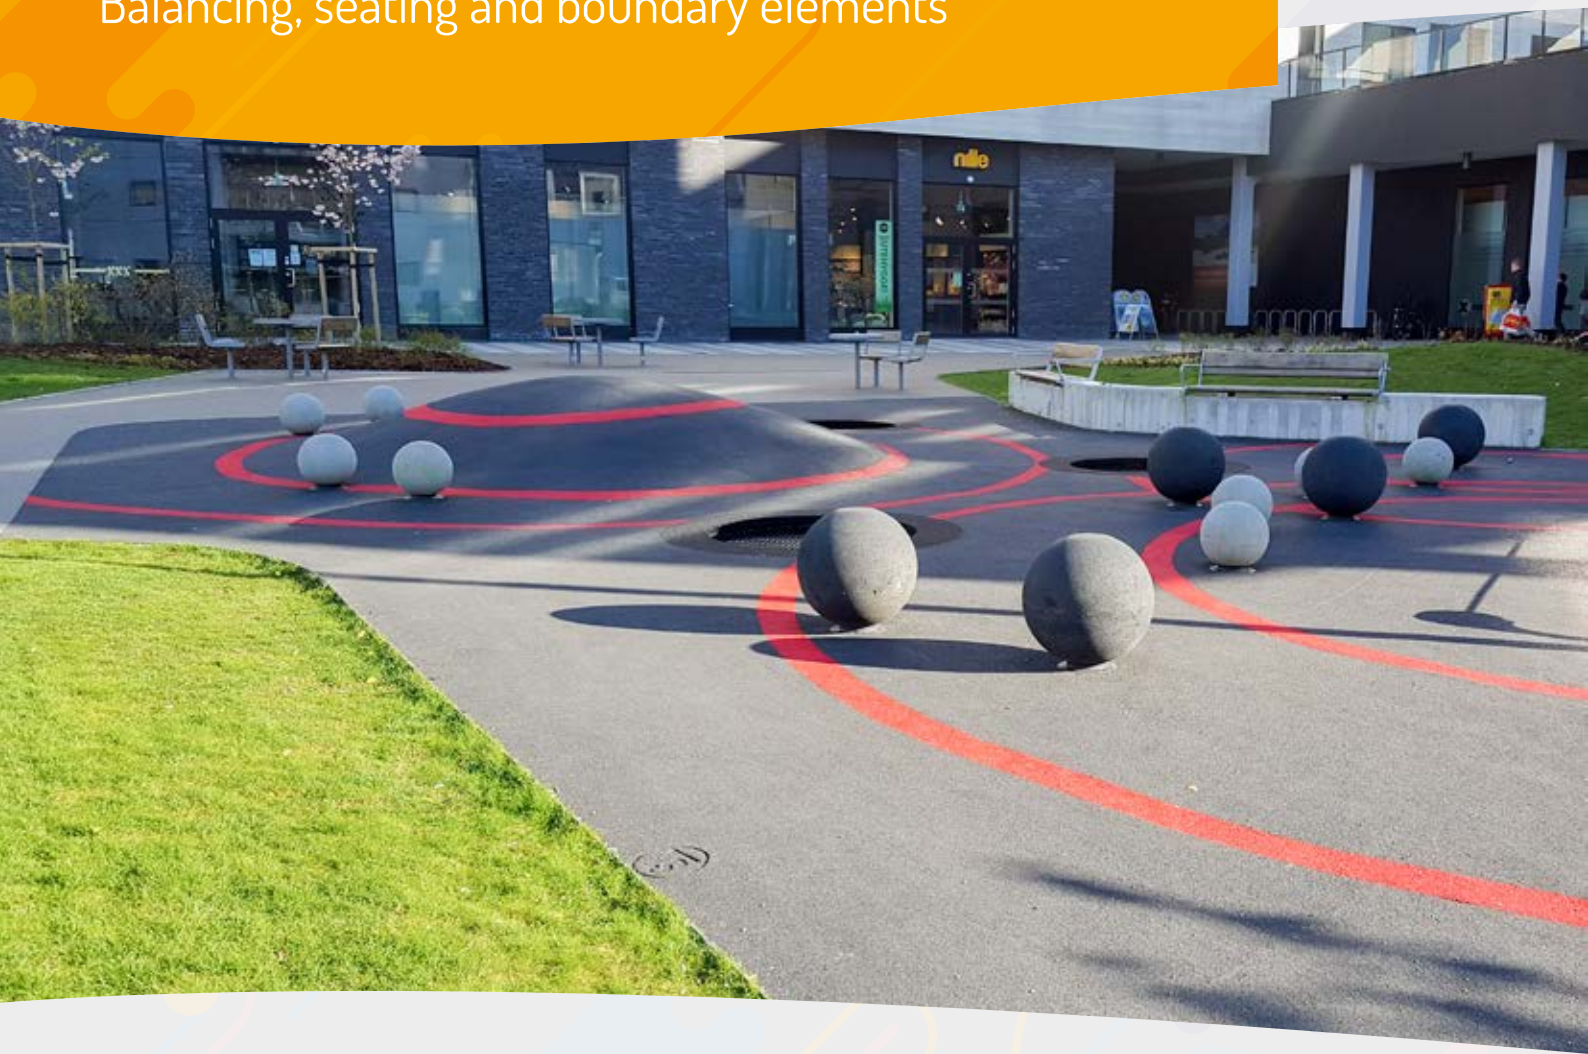

Advantages and properties

- available in SBR red, green, black, grey
- approved fall height 0.9 m (30 mm), 1.1 m (40 mm)
- ideal for multi-purpose sports areas
- 98% ball rebound
- factory pre-installed connectors
- thus fast, simple installation

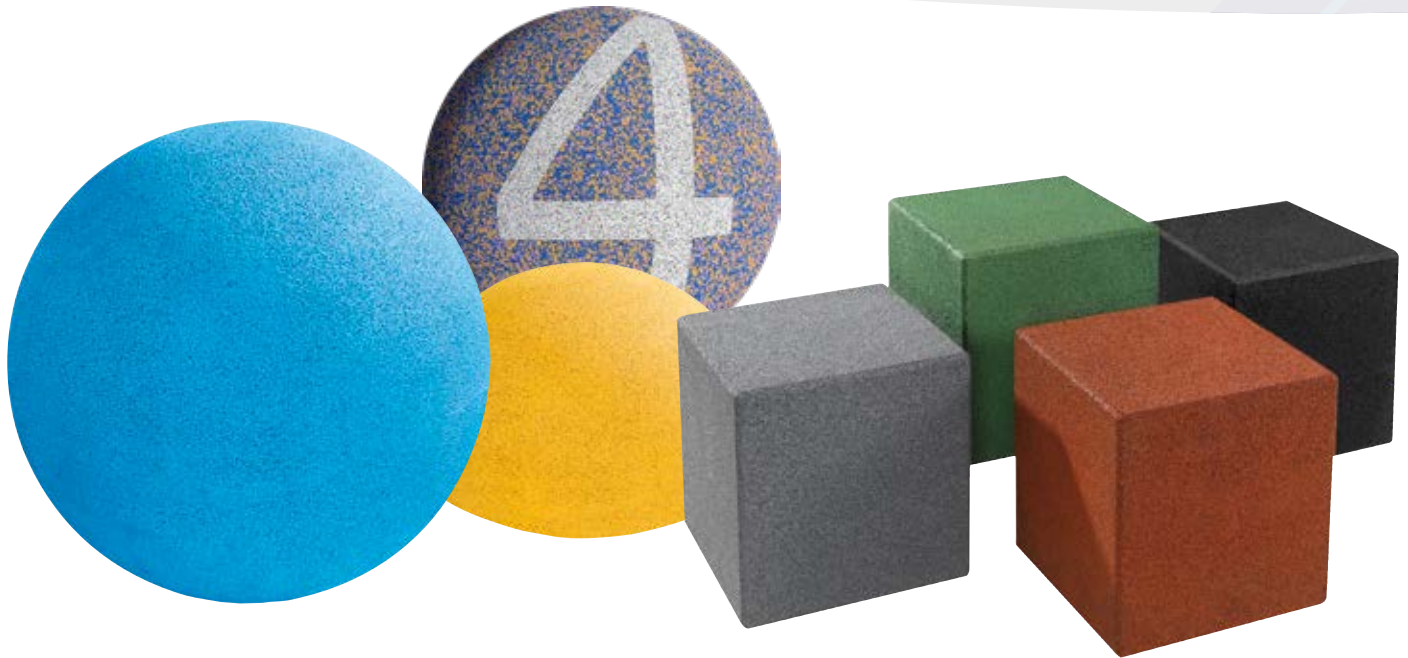

CUBES AND BALLS

Balancing, seating and boundary elements

Due to their harmonious form, these design elements adapt to any environment and round off the overall composition of an area. They can be fastened with steel anchors or base plates. Why are these elements so popular? They are beautiful, colourful and versatile. They can also be used as borders, seating elements, climbing elements and decorations.

Advantages and properties

- ideal for climbing and as a design or boundary element for outdoor fitness areas
- ideal for combining with other fitness equipment
- high colour diversity (SBR, EPDM or EPDM multicolour rubber granulate)
- different sizes (345, 500, 695 mm)
- Balls & hemispheres also available with numbers
