

EUROFLEX® URBAN STYLE

Borders and design elements for parks and urban spaces

EUROFLEX®

BALLS AND HALF BALLS

Seating and bordering elements

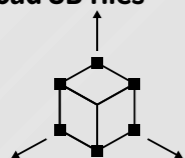

Download 3D files

.DWG

.STEP

.STL

EUROFLEX® balls are popular design elements. Thanks to their harmonious shape, EUROFLEX® balls can be used in a variety of ways and adapt to any environment. They can be fixed by means of steel anchors. EUROFLEX® balls are suitable as seating elements in pedestrian zones and parks or as boundary elements, e.g. for the visual bordering of areas.

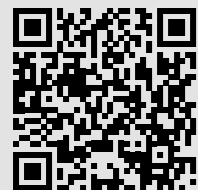

Advantages & properties

- high colour variety (different standard and EPDM colours)
- different sizes (345, 500, 695 mm)
- fast drying
- non-slip surface, therefore suitable for balancing
- high resistance to frost and weathering
- chlorine and salt water resistant

CUBE

Seating, bordering and balancing elements

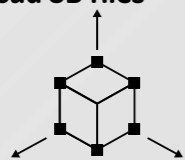

Download 3D files

.DWG

.STEP

.STL

EUROFLEX® cubes are suitable as a design element in play areas, as a seating element in parks and as a boundary element, e.g. in pedestrian zones or for the visual demarcation of areas. Furthermore, they are suitable as climbing elements or for balancing. They can also be easily installed on play areas with water fountains or directly in the water.

Advantages & properties

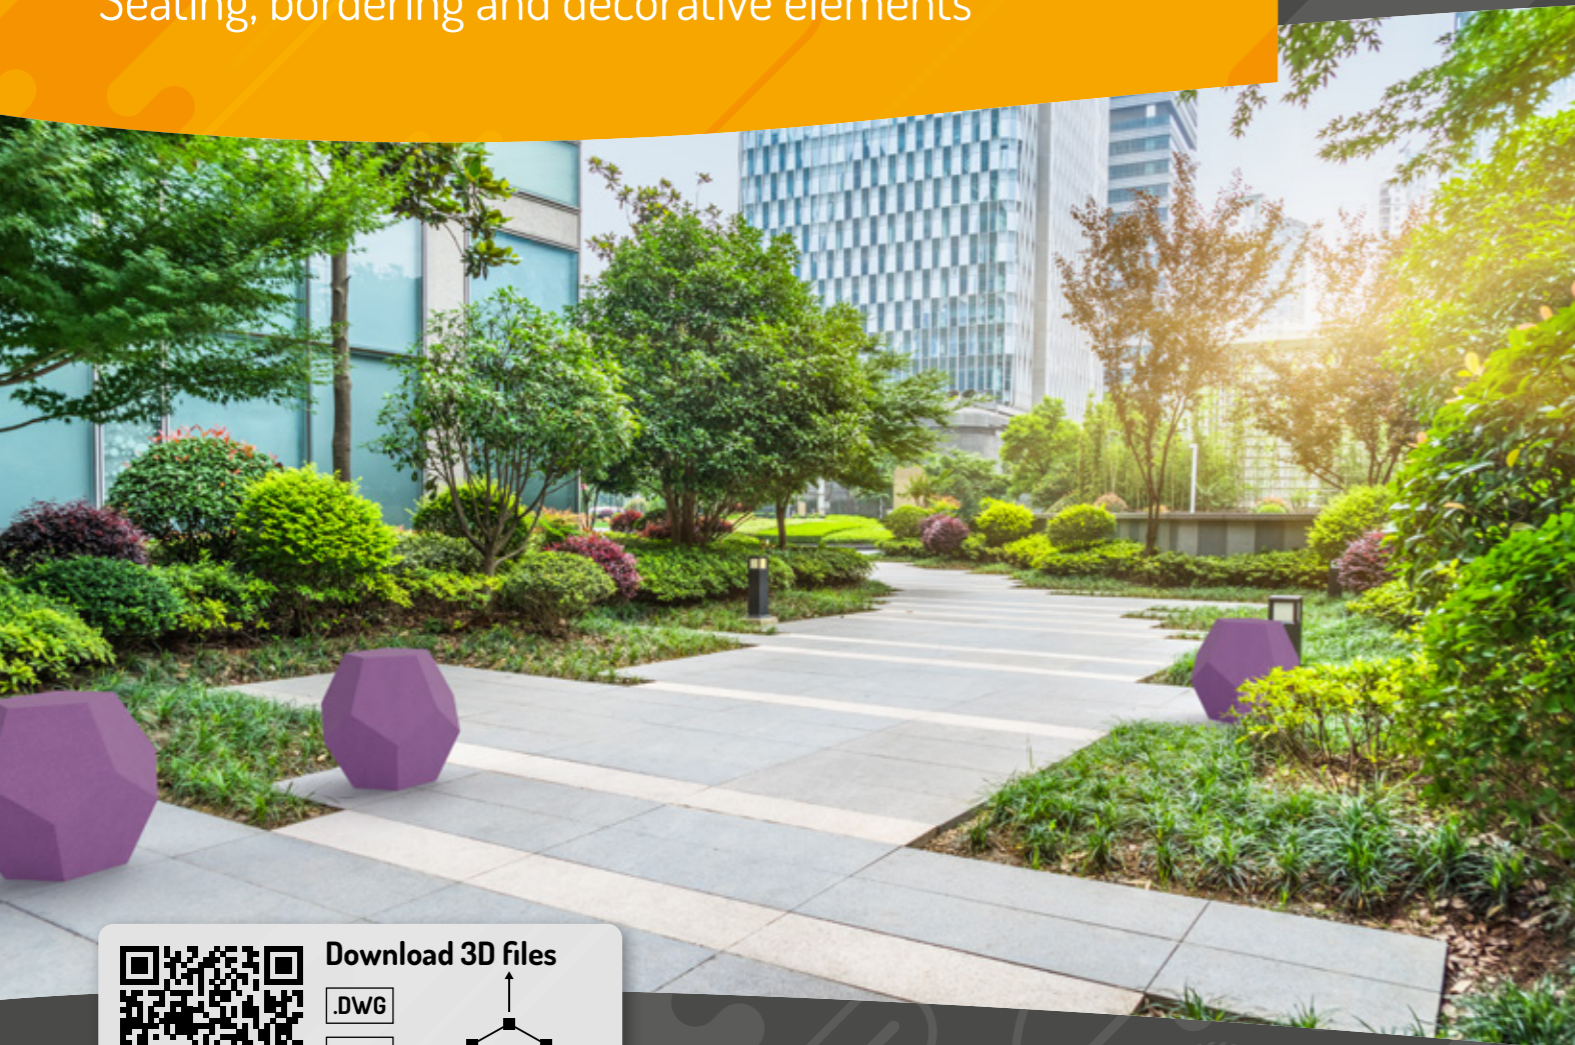

- high colour variety (different standard and EPDM colours)
- fast drying
- non-slip surface, therefore suitable for balancing
- high resistance to frost and weathering
- chlorine and salt water resistant

DIAMOND

Seating, bordering and decorative elements

The EUROFLEX® diamond is a dodecahedron that can be used in parks, green spaces and playgrounds as a seating, balancing or demarcation element. It fits seamlessly between the cube and the ball and provides a further design variation. It is also available as a half diamond. Strong EPDM colours are particularly exciting and can be used as colour accents in coordination with the surroundings.

- chlorine and salt water resistant

S AND C-BLOCKS

Creative, flexible design elements

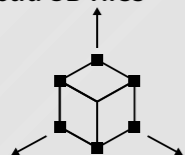

Download 3D files

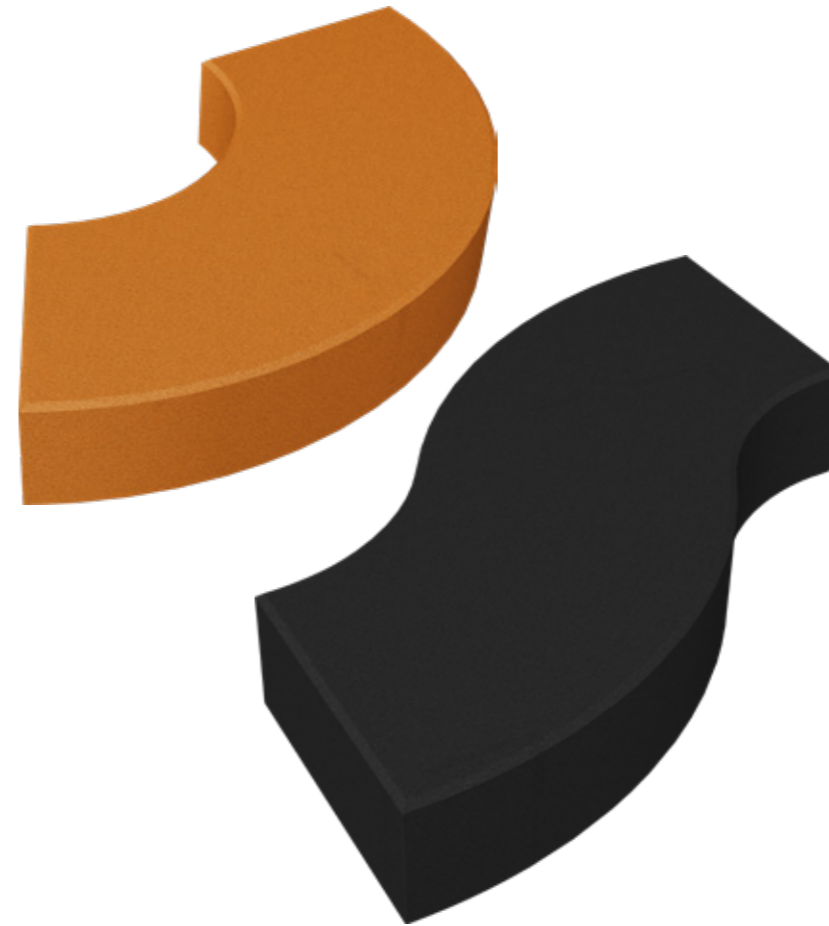

.DWG

.STEP

.STL

EUROFLEX® S-Block and C-Block are incredibly flexible design elements. They can be placed on top of each other or next to each other in any way to create great geometric shapes. The elements can thus be used as seating areas, as a play element for children or also as a boundary to other areas in parks or urban spaces.

Advantages & properties

- high colour variety (different standard and EPDM colours)
- fast drying
- non-slip surface, therefore suitable for balancing
- high resistance to frost and weathering
- chlorine and salt water resistant

RUBBER PALISADE

Border elements for green areas

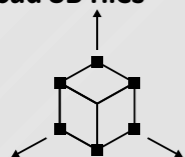

Download 3D files

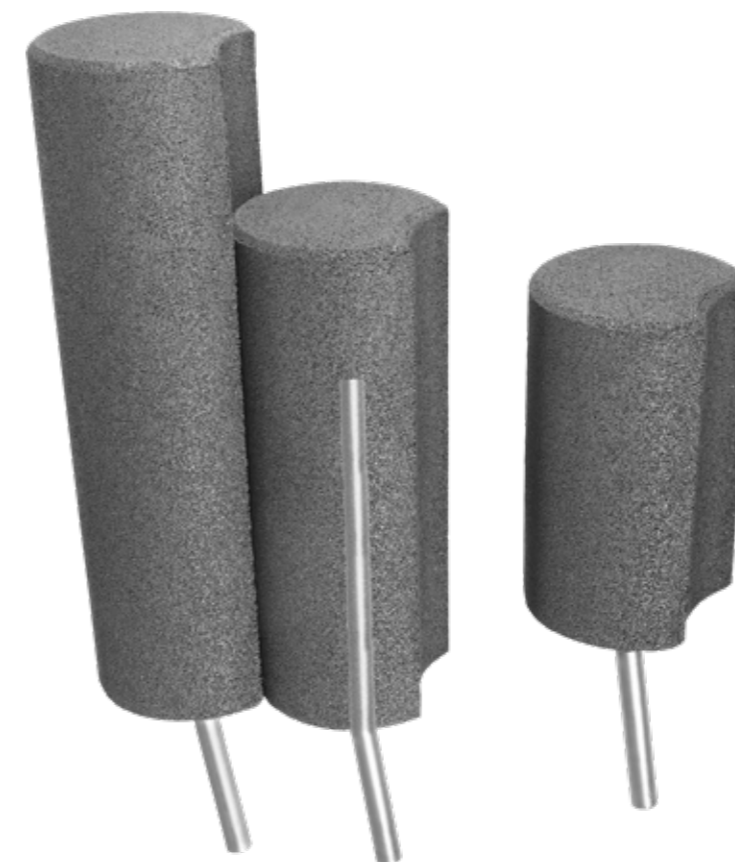

.DWG

.STEP

.STL

EUROFLEX® rubber palisades are suitable for demarcating green plantings on footpaths or paved areas. A particularly deeply integrated steel anchor ensures stability and makes the entire height of the palisade fully usable. The tight finish of the palisade is achieved by a cove. The different heights of the EUROFLEX® rubber palisades allow a wide range of design options.

Advantages & properties

- different heights available (rubber part in 400, 600, 800 mm plus steel anchor 250 mm)
- available in standard colours red, green, black and grey
- fast drying
- splinter-free
- high resistance to frost and weathering
- chlorine and salt water resistant

EDGE PROTECTORS

For minimizing danger on hard concrete edges

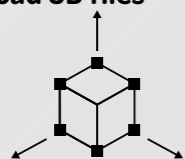

Download 3D files

.DWG

.STEP

.STL

The EUROFLEX® edge protector easily eliminates all hard concrete or metal edges thanks to the soft, elastic material recycled rubber granulate, thus minimising the risk of injury on larger, multi-level seating areas. The material can be easily cut to any length and is attached to the edge with adhesive. The product can even be bent to slight radii when subsequently fixed with dowels. Design accents can be set with four different standard colours (red, green, grey, black).

Advantages & properties

- minimizing danger on hard concrete or metal edges
- comfortable seating
- easy to cut to size
- fast drying
- splinter-free
- high resistance to frost and weathering
- chlorine and salt water resistant
- available in standard colours red, green, black or grey

STANDARD AND EPDM COLOURS

For flexible design

IMPACT PROTECTION & PLAYGROUND ACCESSORIES FOR PLAYGROUNDS AND MULTIPURPOSE SPORTS FACILITIES
